## OBJECTIVE

Front-end Software Engineer with nearly 3 years of experience in responsive web applications, currently working at Amphora, seeking to apply my skills to create engaging user experiences in a collaborative environment.

## WORK EXPERIENCE

**Amphora**  Bangalore, IND
Software Engineer *Aug 2024 - Present*

**Sara-lite** | *React, TypeScript, Ant Design, Streaming response, React Query, PDF viewer*

- Built Sara-Lite from the ground up using Vite, React, and TypeScript, with Rollup as the bundler for optimized performance, and implemented Airbnb's ESLint rules to maintain high code quality and consistency across the project.
- Developed a real-time chat feature that utilizes streaming responses to ensure faster, more dynamic user interactions, greatly enhancing the overall user experience and responsiveness of the app.
- Designed the user interface with Ant Design, creating a modern, sleek, and intuitive UI that aligns with the latest design trends, resulting in an engaging and seamless user experience.

**Sara-MVP** | *React, Material ui, TypeScript, React-Query, React- Context, websocket*

- Refactored legacy code with React, Axios, MUI, and WebSocket, boosting scalability, performance, and real-time notifications.
- Implemented reusable functions and error boundaries, optimizing the code for better maintainability, scalability, and smoother user experience.

**CompUp (YC S22)** Bangalore, IND
Front-end Engineer *Apr 2022 - Aug 2024*

**Comp-up** | *React, Material ui, TypeScript, React-Query, React- Context, Formik, Storybook, Lerna Workspace, and Echarts.*

- Developed a UI component library within a Monorepo architecture, reducing development time by 40% and ensuring consistent branding across all products.
- Improved efficiency by implementing Storybook for UI testing and optimizing data fetching with React Query, improving user experience, and reducing bug resolution time by 40%.

**Real-time benchmark** | *React js, TypeScript, React-Query, CSS, yarn workspaces, JavaScript, yup*

- Optimized state management with React Hooks and Context API, ensuring a responsive UI and seamless interactions.
- Handled 100,000+ company records, demonstrating expertise in scalable data management for optimal performance.

**HireSure - Digital Offer Experience** | *React js, TypeScript, React-Query, CSS, yarn workspaces, JavaScript, yup , Apex chart*

- Revamped Hiresure's dashboard, enhancing functionality and UX with modern web technologies.
- Improved data presentation and visualization, empowering HR professionals to make informed decisions.

## PERSONAL PROJECTS

**PROMPTOPIA** Developed "Promptopia," a user-focused project with Google authentication for direct login and intuitive prompt management (creation, editing, deletion). It uses MongoDB for secure data storage and prioritizes a sleek, user-friendly UI for an enhanced, seamless experience.

**okrahul.dev** Built a Personal Portfolio using React.js, designing a custom UI with Tailwind CSS for a fully responsive layout. The portfolio features both dark and light mode options with a well-chosen color scheme. Additionally, worked on SEO optimization, ensuring that searching for "okrahul" on Google returns the portfolio as a result.

## EDUCATION

**Master of Computer Science**, Jiwaji University, Gwalior  2019 - 2021 | Score: 8.5 CGPA

**Bachelor of Computer Science**, Jiwaji University, Gwalior  2016 - 2019 | Score: 65%

## SKILLS

| | |
|---|---|
| **Technical Skills** | JavaScript, React, TypeScript, Redux, Svelte, ContextAPI, React Query, MUI, Tailwind |
| **Soft Skills** | Communication, Writing and Adaptability |
| **Developer Tools** | Axios, Postman, Figma, SEO, Docker, Git, Webpack, Babel, npm, Yarn, Storybook |

## EXTRA-CURRICULAR ACTIVITIES

- I actively write blog posts to share the knowledge I've gained, earning four badges for my contributions on dev.to.
- Passionate about meeting new people, I actively attend events in Bangalore, including React Bangalore meetups, to connect with fellow developers and enrich my learning experiences.
